EMERGENCY CARD

Citrin Foundation

I have a condition called: **CITRIN DEFICIENCY**
(**CD: Inherited metabolic disorder**)

IMPORTANT INFORMATION:

- **Please do not treat CD patient with high glucose infusion and GLYCEROL®.** There are no issues with general infusion to treat hypoglycemia, diarrhea, or vomiting, but in order to promote faster recovery, it is advisable to let patient consume what they wish after their appetite returns.
- **Avoid fasting** or prolonged periods without eating.
- Monitor for signs of **hyperammonemia** (elevated ammonia levels) and **hypoglycemia** (low blood sugar).
- Please be aware of **metabolic decompensation**.
